EC Regulation No. 1907/2006 – REACH / RoHS

EC Regulation No. 1907/2006 (REACH) deals with the registration, evaluation, authorization, and restriction of chemical substances. The aim of this regulation is to ensure that the manufacture, import, and use of chemical substances do not have adverse effects on human health and the environment.

Our products are articles as defined by the REACH Regulation and are not themselves subject to registration requirements under Article 6 of REACH. The chemical substances used in manufacturing are sourced exclusively from suppliers who have duly fulfilled their registration obligations under REACH. We have the corresponding supplier declarations on file

The information requirements under Article 33 of REACH are complied with. The following products in the SMARTFLEX®, PU 0.6 CNC, P2 SE, and P2 CNC series contain a substance listed in the current Candidate List (SVHC) under REACH (as of February 4, 2026):

- Triphenyl phosphate (CAS No. 115 86 6)

The required information pursuant to Article 33 of REACH is made available to our customers.

To the best of our knowledge, Directive 2011/65/EU ("RoHS") and Delegated Directive (EU) 2015/863 do not apply to our products, as they do not fall within the material scope of the Directive.

Irrespective of this, we currently have no indication that the substances listed in Annex II of the RoHS Directive exceed the maximum permissible concentration limits specified therein.

This declaration is based on the current status of legal requirements as well as on information from our suppliers. No further warranty or quality assurance is implied herein.

Sincerely

Quality Assurance | Ocono Ruhrkunststoff GmbH
